Reflection on Kathy's beach house

I like this beach house because it was very fun and cool. One thing I liked from this project was building the floors and finding the area and the height. Another thing I liked was that you can make anything. Kathy's house was very fun and cool to do. One last thing is that this math project was very fun. At last this house was very cool. This house is a two story house very big and right next to the beach. The house has a volleyball court outside and a pool outside to inside the house there is a baseball court and soccer court and a basketball court. Down stairs she has 3 rooms one master room 3 bathrooms and 1 kitchen and her own room with diet coke. At last I think this house was very fun to do and hard to do to. As you can see this is a house with Kathy's beach house.

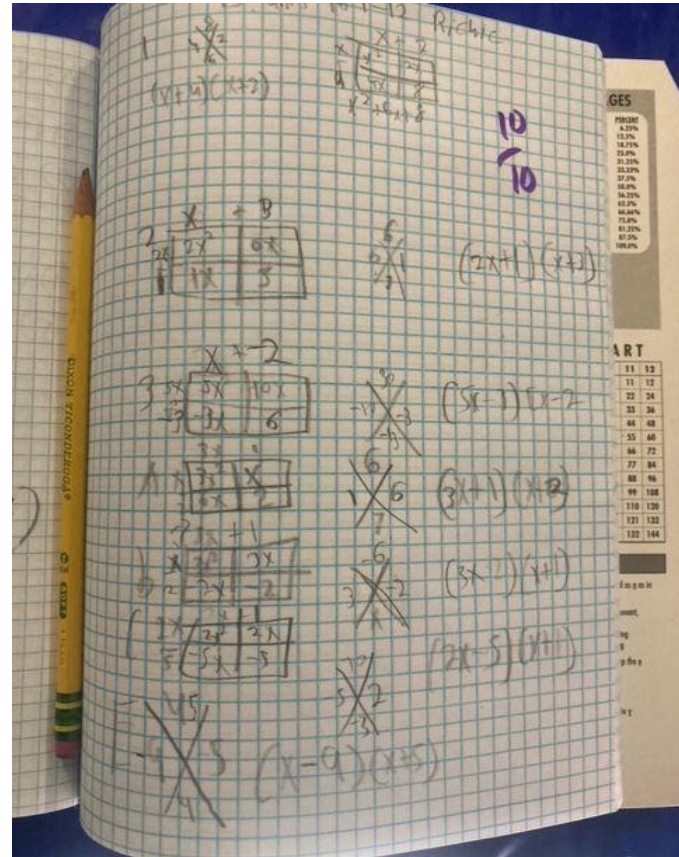

- A solution to a difficult or non-routine problem, that demonstrates originality of thought.

Math ys 10-20

This is a work that all my partners did and it was 13 problems we all had to do. I chose this because it was very fun to do and I had a great time working with my partner. Something new I learned was how to solve quadratics and how easy it can be to do it. I liked this because I got to work with my partner and how challenging it was. Something it says about me is that it is challenging and hard to do.

- A problem that uses 2 or more algebraic concepts and its solution.

Frog dissection/ science

We are going to talk about a Frog dissection. It was very fun to dissect a frog but nasty. I Liked it because you could see a lot of parts the we studied. Something I didn't like was touching it he was very squishy. I chose this dissection because it was the first dissection we did in TLC. Something I learned from this dissection was that all humans and animals have different parts in the body. Something it says about me is that we both jump high.

- A science lab or project.

Bones in Water and Vinegar

This was a project that we did as a whole class it was very fun and cool it was about two bone on being in water and the other one being in vinegar. I chose this because is a very fun lab and I really like it. Something I learned from this lab that it does matter where you put your bone. Something I liked from this lab is that one bone was very hard and the other bone on the vinegar was soft and squishy. Something it says about me is that it very funny and soft and squishy but hard bones to.

- An assignment that represents two or different subjects we have studied.

Describe the bones: *yes* Ricardo 10%

Bone in Jar with no liquid	Bone in Jar with Vinegar
<i>red on the Ends</i> Solid	<i>end are squishy</i> End will see?

Draw the bone and show the insides- label the parts you know from our last class.

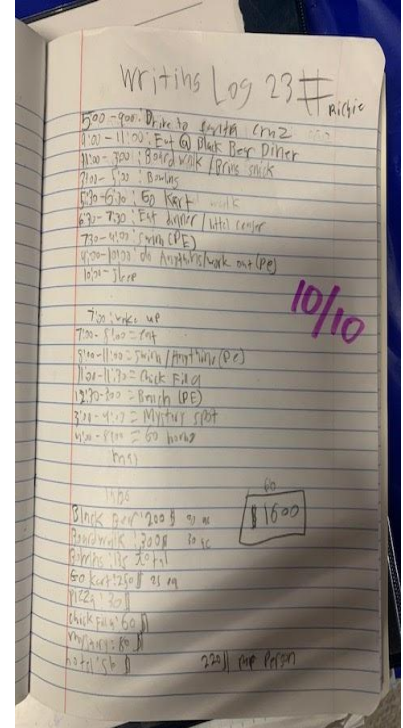

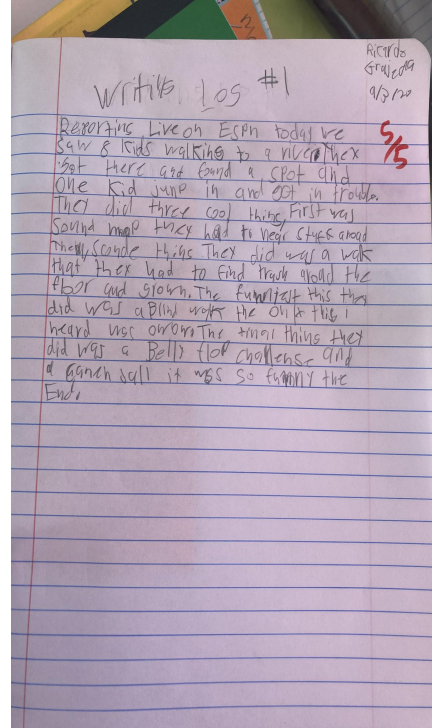

Analysis and Conclusion:

1. Why was one bone put in an empty jar?
To see what it is like normally
The control
2. What happened to the bone that was in the vinegar for 3+ days?
The Ends got squishy and the blood cell were gone.
3. Why do you think the above happened? What does calcium have to do with this?
Because vinegar is acidic

Writing Log #1 and #23

This is my first writing log and recent writing log these are thing that we wright about a book that we already read and we write about it. I chose this piece because I really like doing writing log and I like it because it's really fun to do. Something I learned from this was that I learned how write better and better paragraph. Something I liked from these were that you can write whatever you want but it has to be about the book or something that Kathy put. Something it says about me is that it I really likes writing and it very cool to read it when your done.

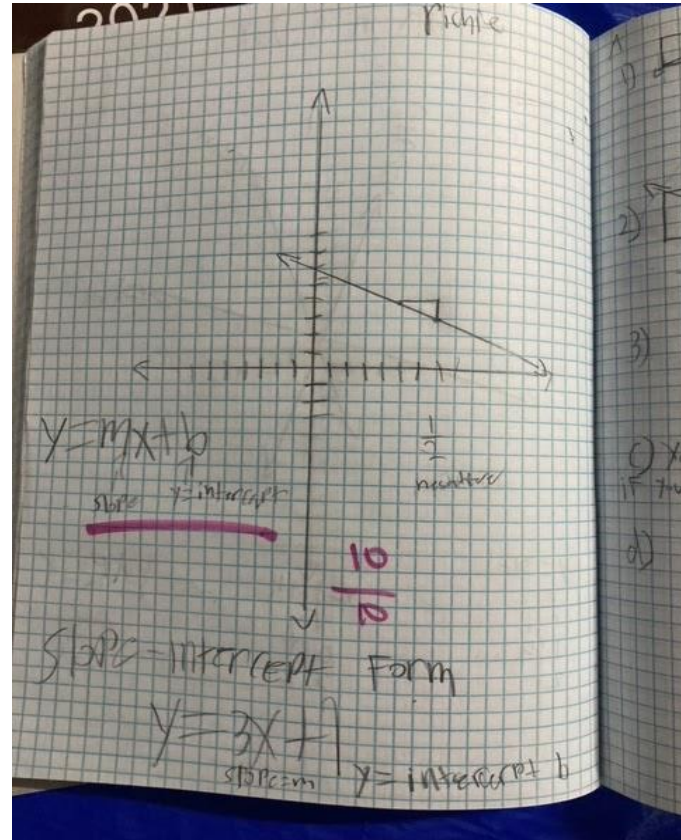

- Two writing samples: One from beginning of the year and one from the end of the : the two together should show growth.

Math slope in a day

We all did slope in a day as a whole class it was very fun but challenging. I really like it because I learned something new that I have never seen. I chose this piece because it was something new I learned. Something I like from this was that we all did it and people were helping me something it says about me is that it very challenging and I like a challenge.

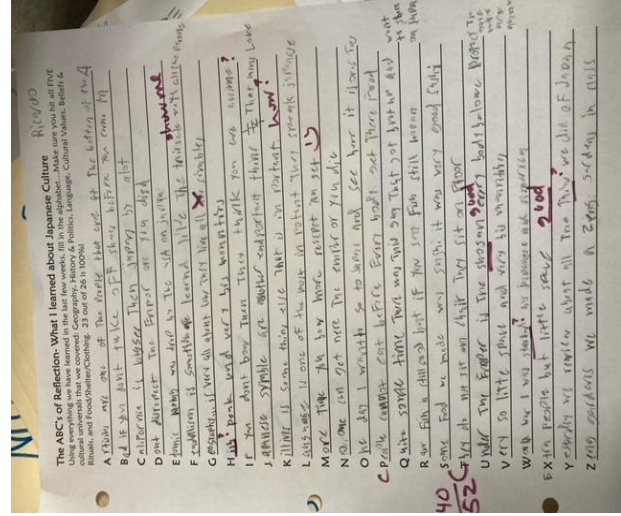

- An example of mathematical visual, chart, or graph.

Japan test

This is a test that we took it was about japan and it was hard but fun. I chose this piece because it was one of the most funnest test that I did. Something I learned it that you should know how to start with the abc. Something I like was that it was challenging but fun. Something it says about me is that it has a lot of latter so it all over the place so i am crazy so it all crazy.

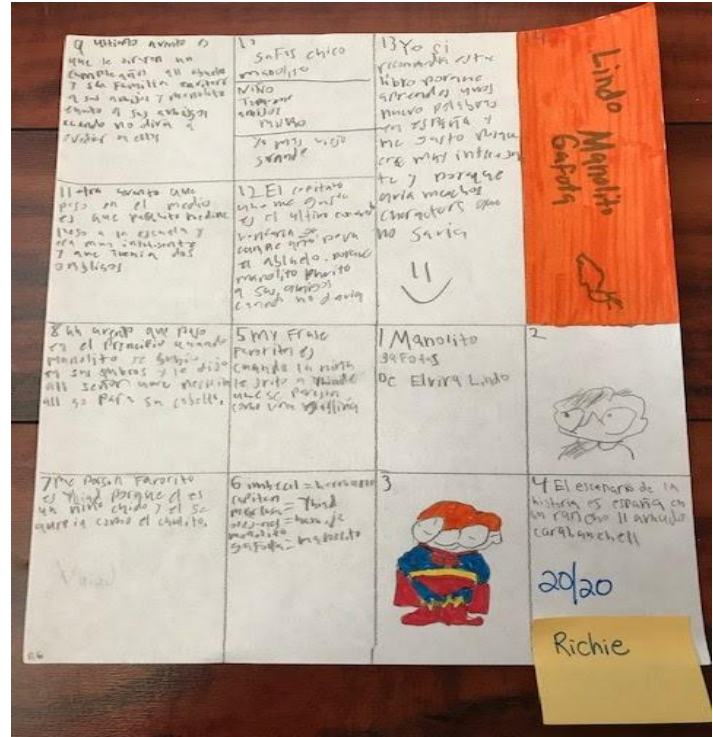

- A project that shows something about a culture we studied

Manolito gafotas

Esto es un one pager es una cosas que hicimos en clase cuando terminamos manolito gafotas. Yo escogí esto porque era muy divertido y me gusto mucho porque podíamos escribir cosas que paso en el libro. Una cosa que aprendí fue que aprendí unas palabra de Espana. Una cosa que me gusto es que el libro era bien chistoso y muy feliz. Una cosa que dice de mí es que es muy chistoso y muy grande.

- An assignment/ project done in spanish.

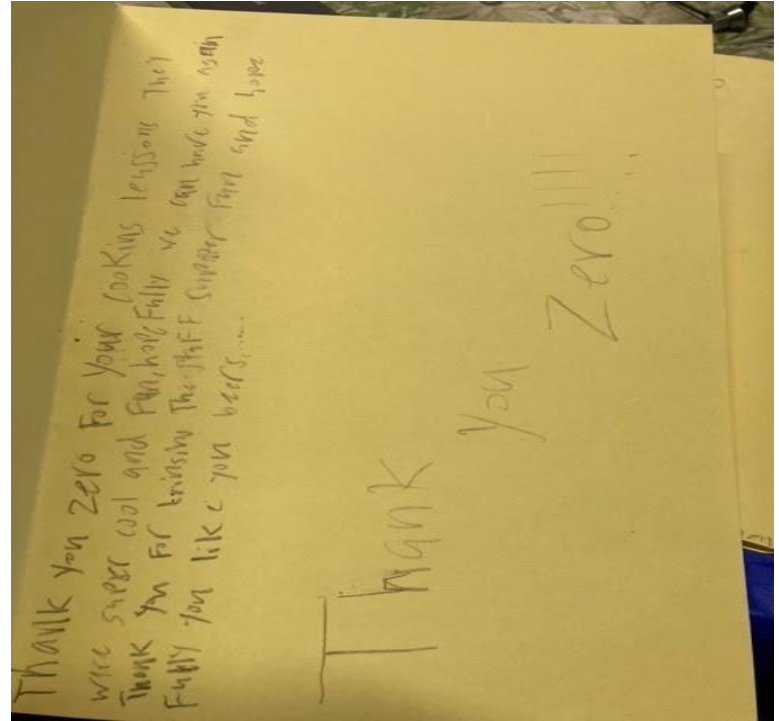

Sushi with Zero

This is all trying to do sushi with Zero. I chose this piece because I like sushi, and it was very fun to do. Something I learned from this is how to make sushi. It was very hard. Something I liked from this was that we made my favorite food.

Something it says about me it that and I am very hard to control because I mess around a lot.

- Group work

Noun and Verbs

This is a nouns and verbs presentation that Marcus and Ralston taught us. I chose this piece because it was very fun and cool how we had to choose pictures and glue them down to the page. What I learned from this was that noun is a place, thing, or person and a verb is the action word that can be in present tense, past tense, or future tense. Something I like from this was that it was very fun to do and you could see a lot new stuff. Something it says about me is that I am very crazy, cool and funny like this assignment.

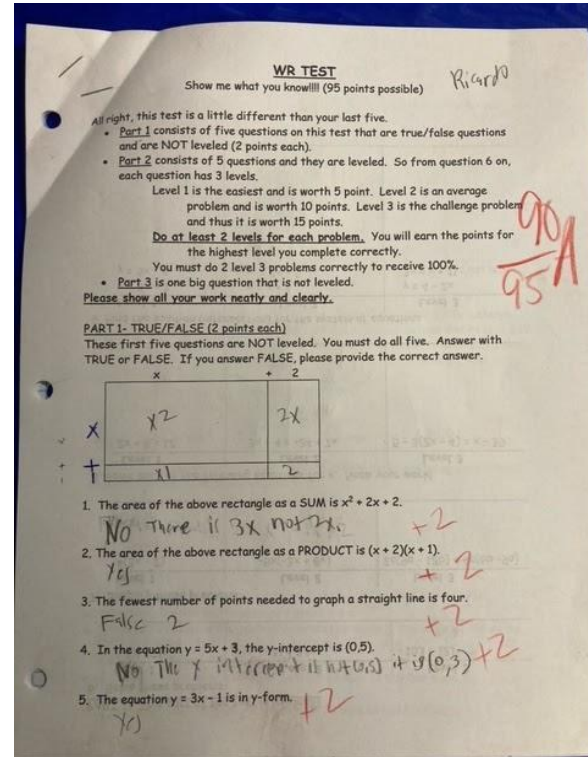

- Individual work

A test or other assessment

This is a test I did so well it was the best test I did in math. I chose this piece because I did so well on the test in it was my favorite test I did. Something I learned from this was that I doesn't really take time for a math test it only takes time when you give it a try. What I like from this was that I did really good on the test I got a A I was so excited. Something it says about me is that I could be very easy or very hard and I can be both sometimes

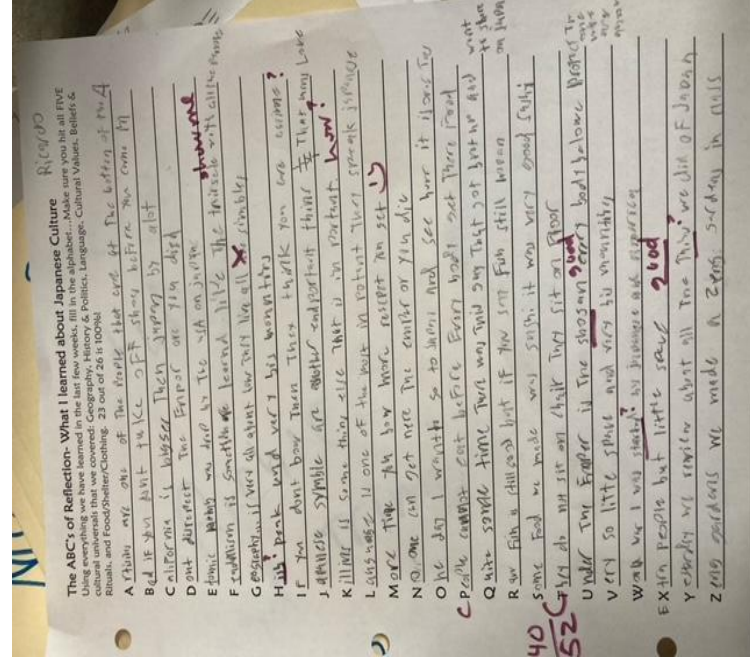

- A test or other assessment

Japan test

This is a Japan test I did so bad on and it was so hard that I did. I chose this peace because it was the hardest test I did and I didn't like it at all. Something I learned from was that test could be very hard. Something I like from this test was nothing it was so hard that I couldn't do anything at all. Something it says about me is that it's very hard. And I could be difficult sometimes.

- A topic I found frustrating

Frog

This is something interesting I like it was super cool but nasty. I chose this piece because I learned a lot new things that I did know about. Something I learned from this was that frog body are very weird and nasty I did not like this at all. Something I like from this was that it was super cool that you could see all the parts of the frog. Something it says about me is that it could be nasty and i could be nasty when I go crazy

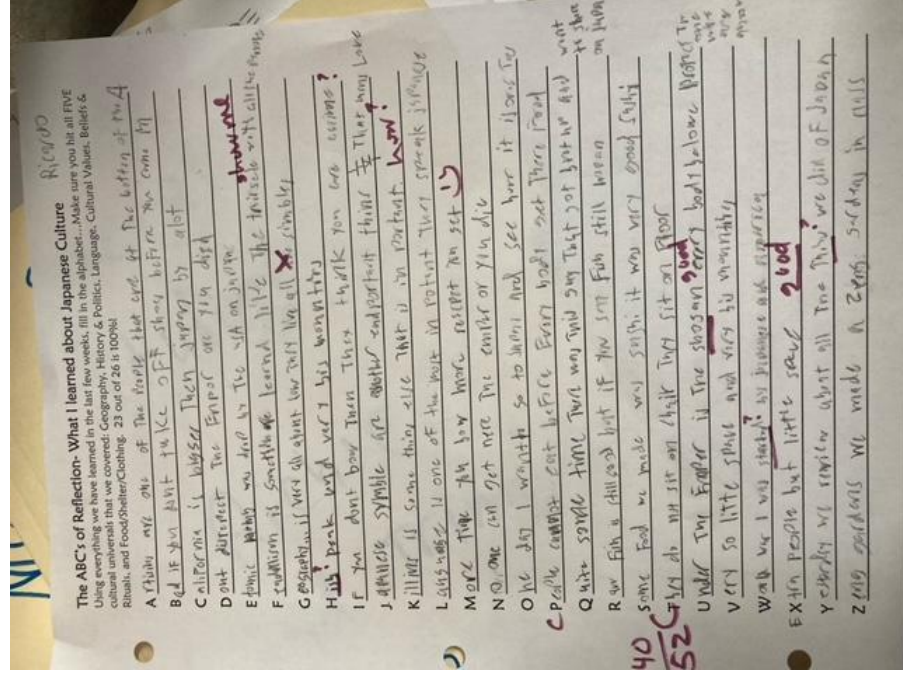

- Something I found interesting

Japan test

This is a test that I didn't do that well but I did learned a lot new stuff. I chose this piece because I didn't really didn't know alot about Japan but after the test I learned so much and I was surprised. Something I learned about Japan is that it's very small and a lot of people can't fit because the mountains are very big and take up 70% of Japan. Something I like from this was that I learned a lot more stuff from Japan. This test shows that I like to learn new things.

- A test I learned a lot from

Bones

This is a project that we did and showed all of our bones. I chose this piece because I can explain this to everybody. Something I learned from this was that I know all of the bones in my body. Something I like from this was that I got to learn a lot new stuff, and it was very cool. This shows that I am interested in science.

- Something I could explain to someone.

Ricardo

BONES/MUSCLES QUIZ

Color in the bones using the key on the side of the skeleton. Do NOT label the bones. Just color them in with the appropriate color. (14 pts)

Cranium - RED
Femur - YELLOW
Humerus - GREEN
Mandible - BLUE
Clavicle - YELLOW
Radius - PURPLE
Ulna - RED
Phalanges - GREEN
Patella - BLUE
Pelvis - BROWN
Spine - ORANGE
Tibia - PURPLE
Fibula - BLUE
Sternum - GREEN

13/24

Now show the location of the following muscle. Be sure to write the muscle near its location and draw an arrow showing where it is located. You must label 8 muscles (label more for extra credit.) (10 pts)

abdominalis	trapezius
bicep	deltoid
tricep	pectoralis
quadricep	hamstring
latissimus dorsi	gastrocnemius

BP math test

This is a math test I did poorly on. I was very mad. I chose this piece because it was the worst grade I have earned. Something I learned from this was that tests can be very hard. I was really disappointed on this test. This shows that I am not a great test taker. I understand the material, but my test grades don't show that.

- A problem I did poorly.
